- Provides a comprehensive range of features, functions and substantial tools for palm oil mill operations and management
- Gives visibility into operations
- Streamlines workflow processes
- Monitors expenditures and controls budget
- Boosts productivity and eliminates inefficiencies
- Rapid implementation and deployment
- Easily and remotely accessible
- User-friendly interface

- Quick return on investment
- First-class service and support

Visibility into operations

It gives an in-depth insight into mill operations by providing easy access to crop, processing, quality and financial informations. Thus, identifying the operation's strengths and weaknesses as well as facilitating analysis for timely and effective decision making.

Complete operational support

A complete palm oil mill management solution that includes weighbridge, crop grading, processing, laboratory, inventory, workshop and store management. As well as supports end-to-end workflow efficiencies throughout the mill.

Management controls

It generates operational and financial reports with a few simple mouse clicks. These reports help the management to better focus on processes and controls that are critical to the operation.

Enhances expenditure monitoring

With an integrated budgeting function, it helps mill monitor expenditures and stays within budget.

Boosts productivity

It supports end-to-end mill operations with a single source of data entry. This reduces manual work and duplication as well as enhances information integrity.

Web based enabled

As it is a web based enabled solution, it is easily and remotely accessible at any time and any where via the internet. For far-flung area, it supports remote access via satellite link.

User-friendly interface

It is designed for non-technical users, enabling them easy access of informations. Hence, improving the quality and accuracy of every transaction. Its user-friendly interface allows users to start using it in no time.

Quick return on investment

Its implementation is so rapid that it can be up and running within days, therefore no interruption on business and start enjoying its benefits in no

time.

Expertised support

First-class service and support are ensured by the highly-qualified and certified technical resources provided.
