

Capabilities Statement:

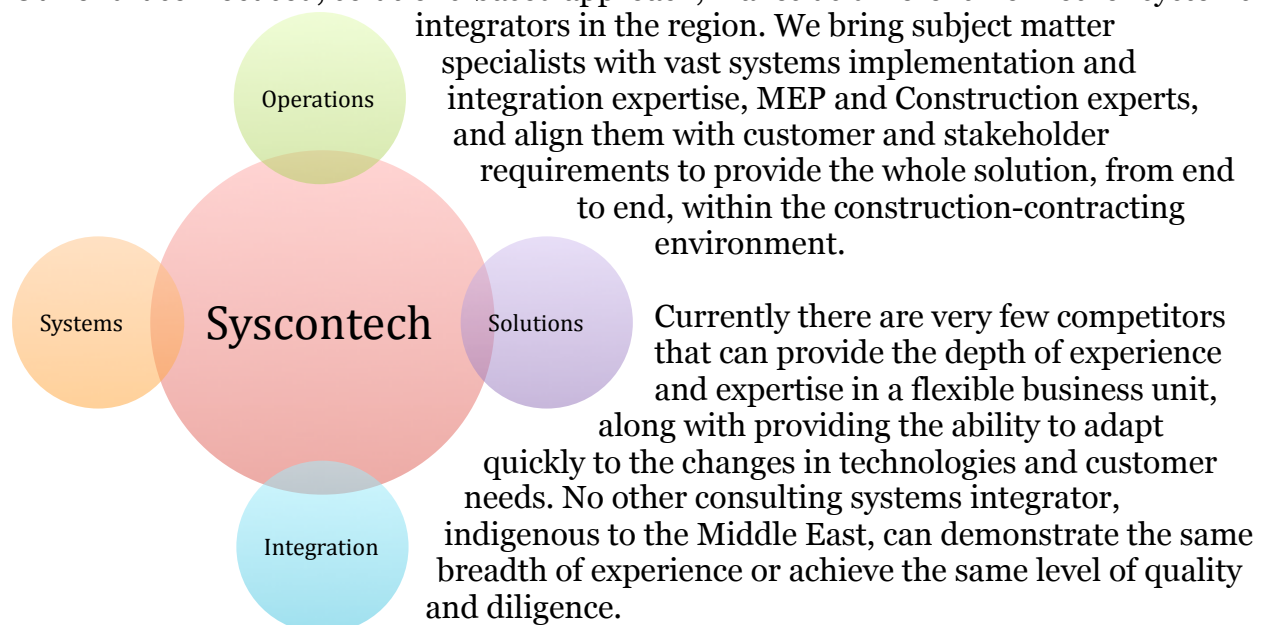

What Syscontech Qatar Does?

Syscontech Qatar provides Systems Consulting, Project Management, and Construction Services to clients based in Doha, Qatar. Syscontech Qatar's core business is providing specialized technical consulting and contracting services to targeted sectors. Where Systems, Technology, IT and Construction require alignment from inception to completion. From conceptual design, implementation to integration, our focus is on systems.

In today's environment, infrastructure projects require specialized and integrated Information, Communication and Technology (ICT) systems to support operations and business goals. The complexity of the integration of these specialized systems requires extensive knowledge and a dynamic team familiar with all components of the systems, and that is able to incorporate the specialized systems into the overall construction process.

Our end-user focused, solutions-based approach, makes us different from other systems integrators in the region. We bring subject matter specialists with vast systems implementation and integration expertise, MEP and Construction experts, and align them with customer and stakeholder requirements to provide the whole solution, from end to end, within the construction-contracting environment.

Who We Are

Through Syscontech's previous work with one of the largest Engineering Procurement and Construction companies in Qatar, we recognized the need for our services in the expanding Middle Eastern market, and over the last year we have been planning and executing our expansion in Doha.

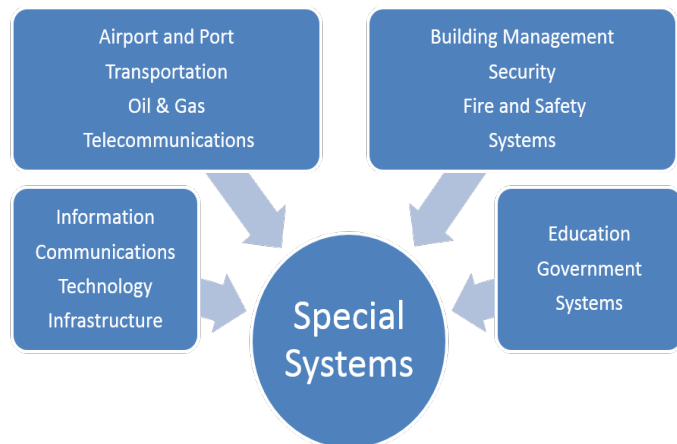

In 2013 Syscontech Qatar was formed as a joint venture between American and Qatari companies to provide specialized Consulting Services and Systems specific Project and Construction Management across Qatar, America, and Thailand.

What Now For Syscontech Qatar?

Syscontech Qatar is in a unique advantage to provide specialized services in Qatar and the Middle East and have already established an expert team to immediately capitalize on available opportunities. Syscontech Qatar is in the position to take advantage of the current void in the IT sectors and capture market share in this specialized consulting niche. In these markets, Syscontech wants to leverage our current relationships with established firms, throughout Qatar and the Middle East, and with our unique expertise provide value to not only our clients, but to our affiliate and partner companies.

We now focus on opportunities in the following sectors:

- **Airports, ports, and large scale facilities**
- **Data centers**
- **Operations centers**
- **Stadiums**
- **Universities**
- **Government and Municipalities**
- **Rail and Light rail projects**
- **Special projects**

Which Services Does Syscontech Qatar Provide?

Syscontech Qatar is able to provide tailored services to end users clients, their preferred contractors and our partner affiliates that can include a selected mix of specialist elements or a complete end-to-end solution within the parameters of a project schedule.

We specialize in Information Communications and Technology, and Special Systems solutions. We demonstrate unrivalled expertise in the areas of Collaboration,

- **Coordination and Integration.**
- **Consultancy and Professional Services**
- **End-to-End Design of Solutions and Subsystems**
- **Construction and Project Management Services**
- **Operations and Maintenance**
- **Systems Installation and Integration**
- **Data Center and Systems Migration**

World Class Service & Support

Syscontech Qatar is committed to becoming the recognized leading Support Provider in the Middle East Security Market. We are achieving this by bringing together a multinational team of specialists with experience in USA, Europe, Asia and the Middle East; we have built a world-class team through whom we can deliver industry best practice to our clients.

Our tiered Support plans provide clients with the ability to choose the best mix of preventative maintenance and emergency response, with the option for fully comprehensive multi-year extended warranty on all equipment.

Where Do We Operate?

From our headquarters in Doha, we currently focus our operations in the Middle East, and our focus will remain in this area. However, our rapid deployment methodology means we can go anywhere and can assure our clients of consistent success.

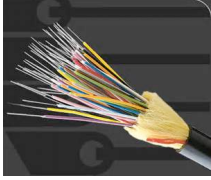

We Focus on Delivery

By bringing together international and local expertise to every aspect of what we do, we have built a capability to reliably deliver on our clients requirements, however ambitious they might be. We are able to help our partners extend their capabilities without having to build their own internal skill set, and by providing a sub-contracted specialist service wherever it is needed.

We Believe In What We Do

Our company is built on a set of core values that influence everything we do and every decision we make. These core values help ensure we provide a consistent quality of service to every client in every sector.

- | | |
|---|---|
| ✓ We do what we say we are going to do | ✓ We build reliable long-term relationships |
| ✓ We anticipate the complaint | ✓ Nobody at Syscontek is too senior to ignore these core values or too junior to insist on them |
