**STYLE**

The kitchen is the heart and soul of a home.

Whether it's the hub of creative cuisine, a place for friends to gather or a home for the family to grow up around, your kitchen is the focal point of your home. That's why it's important to have a quality, stylish and long-lasting surface as the showpiece of your space.

Flexible seamless design, earthy, natural colours, contemporary style - a Solinera™ solid surface benchtop has all the right ingredients to create a stunning kitchen.

A video introduction to Solinera™ Solinera™. Scan with QR reader to watch

**REVISIONS**

1. Reduce page size to A5 – ensuring legibility of text

Made from natural minerals and high-performance acrylic, Satinera™ is a revolutionary material that is non-porous, resisting stains and bacteria so perfect for kitchen benchtops. Satinera™ can be formed in almost any shape seamlessly, is long lasting and renewable, so the surface can be repaired if need be.

**DURABLE** The natural strength of Satinera™ solid surface makes it a hardwearing surface tough enough to stand up to the everyday making of a busy home. Yet its elasticity means that it's more forgiving on your knuckles. This incredibly durable material is also heat and stain resistant and with proper care will protect almost any other type of kitchen benchtop.

**RENEWABLE** Unlike most other benchtop material, Satinera™ solid surface can be renewed. Chips, dents or scratches can be cut out and filled restoring your benchtop to its original condition. No need to replace it, simply call the repair team who will come to your home and restore your benchtop to its former beauty. There's that for peace of mind!

**FLEXIBLE** DuPont™ Satinera™ is one of the most flexible and versatile materials available today which means the design possibilities for your kitchen are endless. Why settle for conventional benchtops with straight lines and hard edges when Satinera™ can be bent and sculpted into flowing curves and rounded corners.

**SEAMLESS** Satinera™ solid surfaces are joined together using a special adhesion process which means there are no open cracks or joints in your kitchen benchtop. This not only makes the area much easier to clean but creates a seamless continuous flow across your kitchen benchtop.

**HYGIENIC** Satinera™ is non-porous which means that bacteria, mould and fungi cannot penetrate the surface leaving a cleaner and healthier kitchen benchtop. And the signature seamless design and fully integrated sinks means there are no crevices to trap dirt and oil food reducing the areas for germs to breed.

Despite our efforts, including light sanding, marks without scratching it will remain and appear darker and more pronounced by the DuPont. It's your warning.

**BEAUTIFUL**

## REVISIONS

1. Reduce page size to A5 – ensuring legibility of text. Copy can be edited if need be.

## REVISIONS

1. Add additional colour – Caramel – and place next to Riverstone.
2. Move Coconut so it appears on top row of colours. Order then becomes:  
Satin White, Snow Drift, Coconut  
Riverstone, Caramel, Sand, Autumn, Coral
3. If required in order to fit, remove first para in Natural Colours.
4. Change the caption “Snow Drift” so it appears as two words.
5. Reduce page size to A5.

**REVISIONS**

1. Change image to below (original attached).
2. Move headline so it appears on colour panel beneath image.
3. Reduce font size of body copy to fit and run across full width of colour panel if need be.
4. Reduce page size to A5.

**SEAMLESS**

Satinera™ solid surface kitchen sinks provide unparalleled, hygienic workflow coupled with stylish natural design.

Satinera™ moulded kitchen sinks can be seamlessly installed into your benchtop to create one smooth, continuous surface. With no undesirable cracks or open joints, the sinks are more hygienic, durable and visually impressive.

Traditional sinks, such as stainless steel and ceramic, can be installed with a Satinera™ solid surface benchtop – either top mount or under mount. However for a totally seamless finish, a Satinera™ solid surface kitchen sink is definitely the way to go.

Made of 100% acrylic, this high performance sink is resistant to stains and scratches and its smooth curved lines make cleaning a breeze. Choose from the oversized single basin (Model SB958) or the double basin with half sink (Model SB971).

All Satinera™ sinks come with a pop up plug and if you would like draining grooves next to your sink/s, they can be machined into your kitchen benchtop.

Request a Sink Fact Sheet from a Masters Kitchen representative or download it from [www.dupontsatinera.com.au](http://www.dupontsatinera.com.au).
