

## FLEET OPTIMISATION

*Maximise the efficient use of your vehicles*

**Do you know what each vehicle costs to run?  
What would one less vehicle add to your bottom line?**

GSB Vehicles will measure fleet utilisation and performance to provide comprehensive analysis and cost saving recommendations for your fleet assets.

We will provide you with options to optimise your fleet by reviewing your vehicle usage patterns, identifying inefficient practices and surplus vehicles. From the engagement, you will be provided with accurate data that support a business case for change to drive cost efficiencies.

## Diagram 2

demonstrate how our services can increase  
safety & profit and reduce costs & risks  
(Wire diagram in the next page)
