

Please make it look more 3 dimensional like this globe – see how it looks like there is a light shining on the top of it.

We want a shadow under the globe like this

We want the water on the globe to stay blue but the land to be yellow – like the image here but please use the shade of yellow used for land in design [1124433](#)

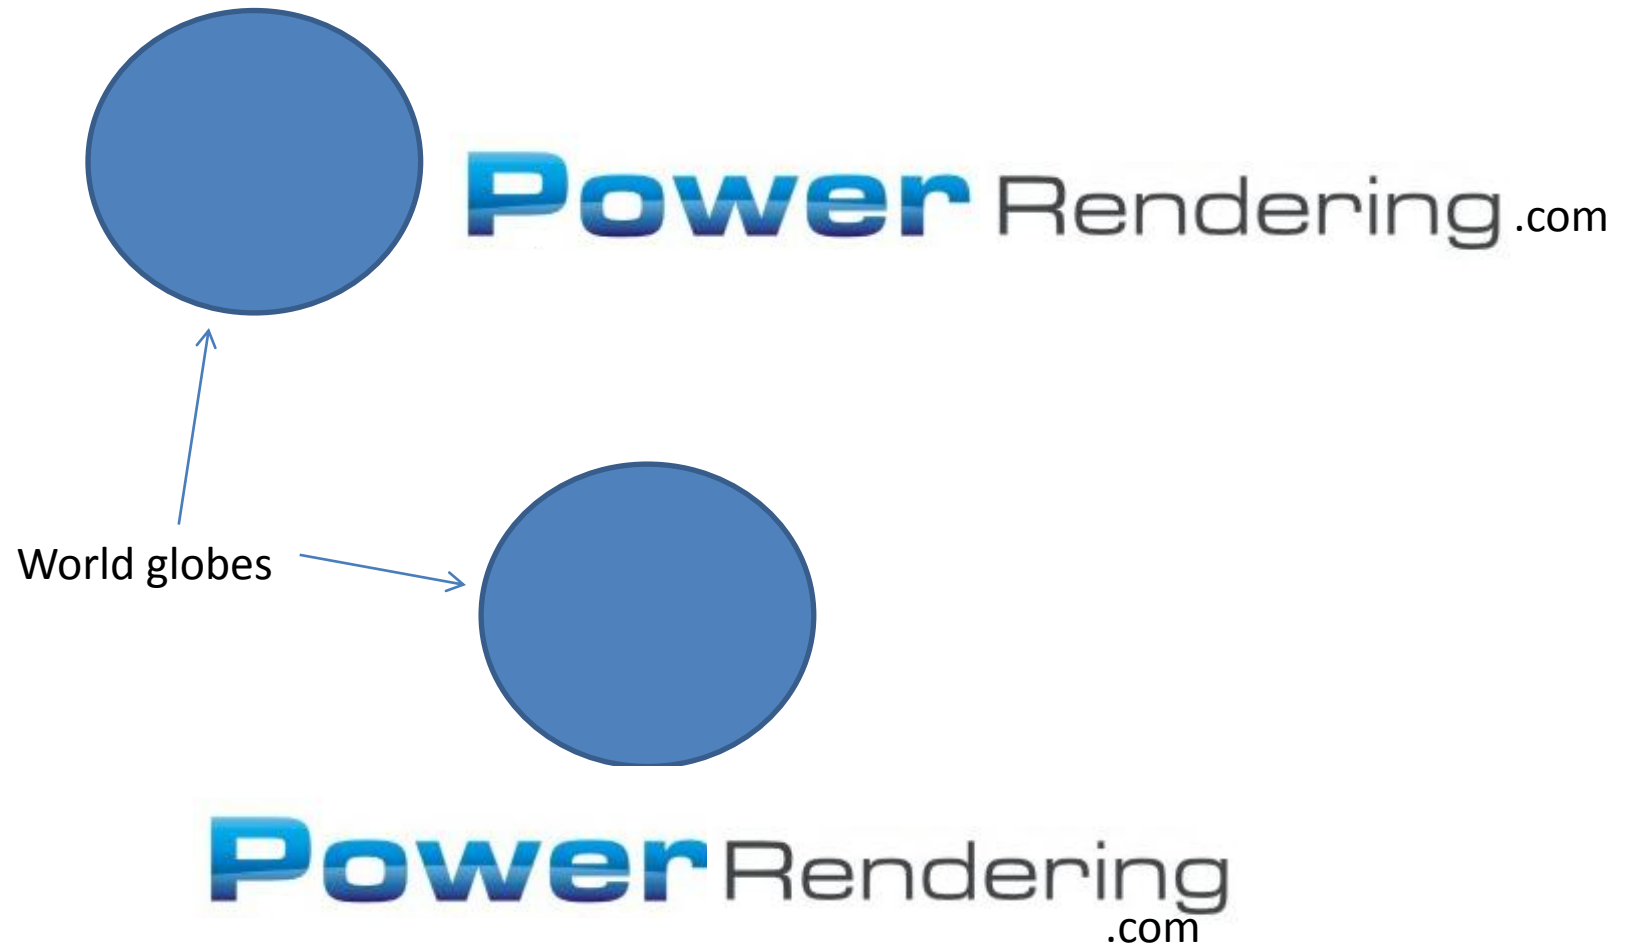

The lines on this globe are almost right. Can you please make it so they don't join at the top though – they need to be 2 completely separate lines that don't touch.

I want a version with this black background along with the other plain logos

This is how we want the Business name layout to be

Keep the top black Business name the same as this but with the new world globe
