# Recycling Industry

## Manchester Super MRF

- M&E/Smoke Control
- Value £1,100,000

*I would like to pass on my appreciation to yourself and your colleagues who were involved in the Mechanical & Electrical Engineering Services during the construction of our Manchester New Generation Recycling Facility. The technical expertise and proposals from your design and project management staff aligned perfectly with our intentions in developing this advanced facility, and were extremely well engineered to control the challenges of extreme dust, heat and moisture within the environment. Your site management team co-ordinated W H Good direct M&E operatives and the other specialist contractors on site, worked well together with the Biffa team, and delivered a very high standard of installation, on time.*

*Yours sincerely Chris Savage Biffa Waste Services*

# Materials Handling Industry

## Worktop Recycling Centre

- SCADA/MCC/Panels
- Value £800k

At full capacity the facility will process 80,000 tonnes plastic per annum.

Using the latest green technology, the plant will clean plastics which are then recycled to be used in various industries - a process known as closing the loop.

# Distribution Industry

## Regional Distribution Centre

- M&E/Renewables
- Value £2,600,000

Design & build new £20m, 460,000 sq ft offices & regional distribution centre with strong emphasis on green credentials.

Specialist systems Include a CHP plant, environmental lighting control and rainwater harvesting.

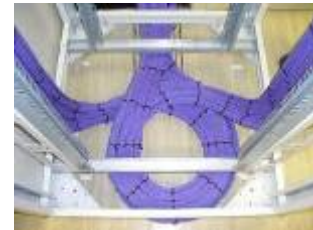

# Manufacturing Industry

**HellermannTyton**

## Head Office & Manufacturing Facilities

- M&E
- Value £1,000,000

Project included Phased new build extension and upgrade to existing North West Facility.

Included were manufacturing, warehousing and office areas.

# Aerospace Industry

## Rolls-Royce

### Sites:

- Ghyll Brow Lancashire
- Bankfield Lancashire
- Derby

### Sample Projects:

- Acid Bath Project
- WCFB Polishing
- Site HV Upgrade
- PPM Cleanroom
- Engine Combustion
- TN3 Thrust Rigs

W H Good have a permanent site presence, undertaking ongoing upgrade and repair works alongside project services.

Services include production facilities Pipework, High & Low Voltage systems, Instrumentation Calibration & Repair, Project Management, Construction & Civil Works, and Machinery moves/installations.

# FMCG/Paper Industry

## Sites:

- Manchester
- Skelmersdale
- Newcastle

## Sample Projects:

- Yankee Hood Upgrade
- TM1 High Speed Conveying
- SW energy Efficiency Project
- Prototype Palletizer
- Area 1-4 Climate Control
- Data Centre Fit out

The sites consist of R&D laboratories, offices, high speed production areas and warehousing/logistics centre.

Automation & control systems, electrical & instrumentation installations, corporate communication networks, and process installations are undertaken, with planned out of hours projects during line shutdowns.

# Pharmaceutical Industry

**Site:**

- Blackley Manchester

The site consists of R&D facilities and central computer centre.

**Sample Projects:**

- E&I Inspection & Certification
- Communications upgrade
- UPS Upgrades
- Server Room reconfig
- Climate Control Systems

# Chemical industry

**Johnson Matthey**

## Sample Projects:

- Instrumentation Installation
- MCC / Control Panel upgrade
- Instrument/Electrical Maintenance

## Site:

- Clitheroe Lancs

Upgrade, repair & installation and commissioning works are undertaken by our site resident personnel working on shift rotation.

Configuration, calibration and site technical support for specialised instrumentation.

# Airports industry

### Sites:

- Manchester International Airport
- East Midlands Airport

### Sample Projects:

- T1 MSCP Refurbishment
- Control Tower Certification
- Rest room refurbishments
- AHU upgrades
- Traffic Security Programme

**2010 Project Manager  
of the Year  
W H Good Ltd**

W H Good are a tier 1 partner working landside and airside, supporting the specific airport operations and the wider group property estates.

Operations undertaken include, civil construction, interior refurbishment, demolition, painting, signage, M&E and communications systems.

# Utilities industry

### Sites:

- Operational offices
- Treatment Sites
- Remote Stations

### Sample Projects:

- 3 Yr Telemetry Framework
- Substation upgrades
- Office Refurbishments
- AMP4 Magflow
- Flow Monitoring

W H Good have a 30+ year track record of working with this client, supporting the power, water, waste water infrastructure operations, and estate facilities throughout the entire region. Secondment support for technical managers on an ongoing basis.
