

## Why is Wolverine a great place to work and intern?

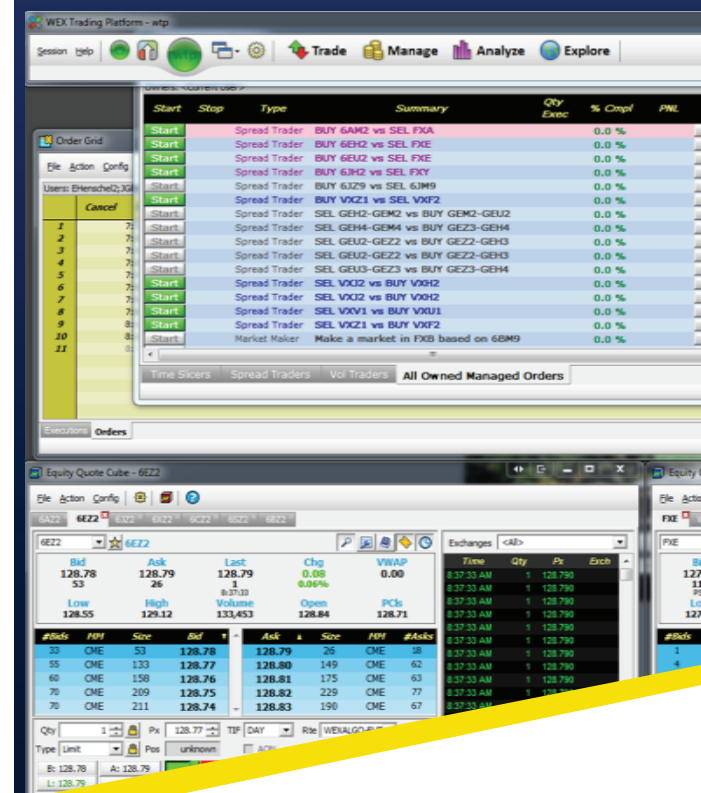

- Full time employment for successful interns
- Exposure to top leaders at the firm (manager mentors, partners)
- Furnished intern housing provided in downtown Chicago
- Full calendar of social events such as monthly expiration parties, intramural sports, team dinners, music festivals and sporting events in Chicago
- Every day is casual Friday
- Food for thought: Our brains need fuel to take on a challenging day so our kitchen chefs provide us with free breakfast, lunch and snacks throughout the day

## About Wolverine Trading LLC

Founded in 1994, Wolverine is a diversified financial institution specializing in proprietary trading, asset management, order execution services, and technology solutions. We are recognized as a market leader in derivatives valuation, trading, and value-added order execution across global equity, options, and futures markets. With a focus on innovation, achievement, and integrity, we take pride in serving the interests of both our clients and workforce. Wolverine is headquartered in Chicago, with branch offices in New York, San Francisco, and London.

# Software Engineer Summer Internship

Wolverine Trading's internship program for Software Engineers offers qualified candidates a unique opportunity to experience the full development lifecycle, while building custom trading applications for a leader in the industry. You will work with a team of top technology professionals, and interact with senior partners and traders, to design and maintain software.

Our 12 week summer internship program serves as a source of hiring full time software engineers. All employees and interns have access to our full-time education department and Director of Education. We are constantly creating new curriculum that informs and leads to collaborative innovation at the firm.

For more information on open positions, or to submit your resume, please visit our website [www.wolve.com](http://www.wolve.com)

## Qualifications

- Bachelor's or Master's degree in Computer Science or Computer Engineering (or pursuing one of these degrees for our internship – must have Junior standing or be in your first year of a two-year Master's program)
- History of academic excellence, with a minimum 3.0 GPA
- Solid understanding of object-oriented design and development
- Knowledge of C++, C#, the .NET framework, and SQL is preferred, but not required
- Excellent problem solving skills
- Desire to work in a team environment
- Interest in financial markets

The best part of my internship is coming into the office, sitting down, and getting to work developing real software for a real company with a team that has gone so far out of their way to help me learn and improve. In fact, I almost never felt like an intern. I felt completely welcomed by my team. They have treated me like a full-time employee 100% of the time. It felt great to be useful and make a real contribution to the team.

*-Software Intern '13*
