

# Information Edge Corporate Profile

Information Edge is a specialist software company providing innovative solutions to enterprises in the private and public sector. Using patented software we provide complete cost effective solutions that offer exceptional value for money.

## Information Edge's solutions are:

### Service Solutions

**InstantFD** is a complete back office accounting service that is prides SME's with:

- A full bookkeeping services
- Revenue and Expense Accounting
- Payroll, PAYE, NIC and employer returns to HMRC
- HR
- Financial reporting
- Budgeting & Forecasting
- Cash flow management

By having all your financial 'back office' needs taken care of, you will have more time to grow your business, and be able to better allocate your valuable time to the parts of your business that most need your attention. instantFD comes at a fixed affordable monthly cost with no hidden extras and can be tailored specifically to suit your business.

**ReportStream** is a service from Information Edge that provides you with all the information you require from your operational systems.

The lack of meaningful, timely and accurate information is an age-old problem ReportStream provides you with all the reports you need, when you need it and, in the format you specify, all at a fixed monthly price. Much more than a software tool, Report Stream is a complete reporting service. Simply put, would you prefer to purchase the latest labour saving kitchen device or have a meal served to you on a plate? ReportStream is exactly that - service on a plate. You order what you wish and we serve it to you - online and in real time.

### Software Solutions

Informer SQL provides enterprises of all sizes to implement a fully-featured business intelligence solution in 3 business days. Using patented technology to achieve electronically what our competitors have to do manually. Informer installs in a matter of minutes and automatically creates a transparent OLAP service that is fully synchronised with your Star Schema. Data refreshes and structure changes are reflected in the OLAP service without the need to build custom interfaces. The end result is a rapidly deployed solution with no risk.

End users are fully trained in one day at the end of which they will be able to Build their own reports and queries, build budgets and forecasts, build complex allocations and build dashboards.
