All the reports you need, when you need them,
formatted to suit you
at a fixed monthly price

your reports served up
when you need them

if you need a report
modified or a new one built

Unlock the potential of your **Agresso**™ system

Business World

Your Agresso system stores the most critical data in your organisation. ReportStream is a service that allows you to access that information in the form of meaningful, correctly formatted and timely reports all at a fixed monthly price.

All the Reports you need...

There is no limit to the number of reports your users can request. They can have as many as they wish and all requests are turned around in minutes.

...when you need them

If you need a new report or require a new one built, just call our dedicated ReportLine. One of our friendly consultants will build your new report for you online in real time.

All the reports are formatted

All reports are formatted to publication quality with your logo, fonts, colours etc. In addition to reports for printing or to be distributed as pdfs, our service includes dashboards built to your specifications

An innovative service that solves your reporting problems

ReportStream is a complete solution to the perennial problem of a lack of information

The lack of meaningful, timely and accurate information is an age-old problem. Many approaches have failed to solve this problem effectively. The use of GUI reporting or BI tools was meant to be a solution but, high failure rates and a massive gap between what was demonstrated and what was delivered has led to GUI reporting tools and BI tools taking pride of place in the "shelfware" category.

The fault goes beyond tools that are difficult to use. Simply put, would you prefer to purchase the latest labour saving kitchen device or have a meal served to you on a plate? ReportStream is exactly that - service on a plate. You order what you wish and we serve it to you - online and in real time.

the peace of mind of a fixed monthly cost

ReportStream is priced at a fixed monthly price based on the number of users. There are no hidden extras - all new reports, modifications to existing reports etc are all covered by the same low monthly price.

Gain even more insight by combining your data with data from other operational systems

You can easily combine data from other operational systems with data from Agresso to gain even greater insight. There is an initial set up fee for this service and thereafter, the comprehensive ReportStream service is provided to your users at the same low monthly cost.

Forecasting the future just got easier

ReportStream allows you to easily add a budgeting and forecasting framework to your Agresso system. ReportStream is fully write enabled and users with the required security permissions are able to quickly create forecasts and store these in the ReportStream database.

Convert static reports into dynamic reports with drill-down and pivoting

ReportStream will re-use all your existing Excel reports. All the time and effort developing these reports is not wasted. Better still, your reports are converted into dynamic reports with on-line drill down capabilities. Start with an aggregate view and drill down to the lowest (transaction) level.

Low Risk Solution

Moving to ReportStream is easy and risk-free. Just run the ReportStream service in parallel with your existing system. You do not have to change anything or stop any of your current processes - you only need to do so when you are confident that ReportStream is a much better and cost-effective solution. As our clients tell us "we will never go back to the bad old days"

Keep your finger on the pulse of your business

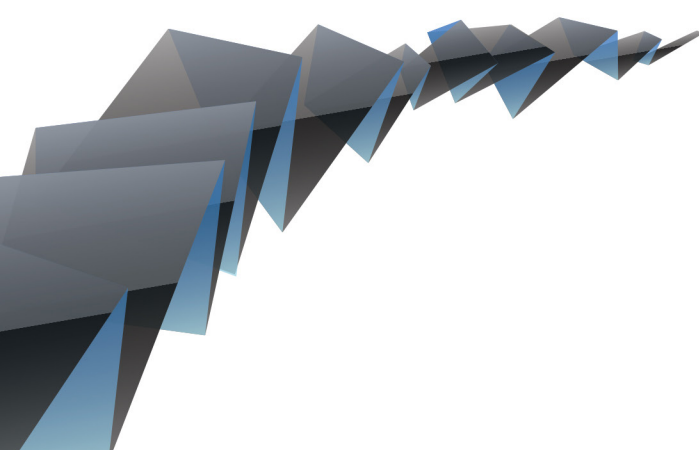

ReportStream has advanced variance analysis and alerts that guide you to problem areas and also to opportunities. Variances are ranked based on business rules that you specify.

Building a business case for ReportStream

Building a business case for ReportStream is straightforward. Savings are realised in the following areas:

- Cost of existing software tools - licence fees and annual maintenance
- Cost of external consultants for reporting projects
- Cost of internal staff for reporting processes

We are happy to work with you to build your business case. All our clients save a minimum of 66% on their existing costs. Yes that is right - ReportStream is 1/3 the cost of other systems.
