

# SECURITY

## **-VIDEO MANAGEMENT / CCTV SYSTEMS**

- IP Based Megapixel technology
- Enhanced detail for student and staff ID and vehicle/license plate ID
- System migration and seamless integration with existing analog or digital system
- Advanced Compression using H.264 technology reducing bandwidth and storage demands
- Remote Accessibility

## **-ACCESS CONTROL**

- IP Based Access Control with optional cloud services
- Complete flexibility - Access can be granted to users according to time and place
- Enhanced facility control for administrators and law enforcement in the event of a crisis
- Integration with IP Access Control and IP CCTV/Surveillance systems
- Intruder and fire alarm integration
- Effective Asset Management tool - Protecting students, personnel, and property

## **-EMERGENCY TOWERS**

- Vandal Resistant Emergency Phones
- Designed to withstand and keep working through the most extreme weather conditions
- Self-Monitoring, providing real-time reporting down the button
- Available with various power and communication options
- 180 and 360 degree speaker systems for public address and mass notification
- Analog and VoIP capabilities

# CCTV SYSTEMS

## WHAT IF:

YOU CAN MONITOR AN ENTIRE PARKING LOT WITH A SINGLE

YOU CAN ACTUALLY MAKE POSITIVE IDENTIFICATION AFTER

YOU CAN ACCOMPLISH THIS FOR THE COST OF A SINGLE PTZ

CAMERA?

RECORDING?

CAMERA?

## CM3 CAN SHOW YOU HOW !

Because we specialize in both traditional analog and IP Megapixel technology, CM3 is able to provide hybrid systems, allowing us to incorporate existing analog cameras with the new megapixel technology. This provides a seamless, cost-effective transition path from low resolution analog images to High Definition video quality as your budget permits.

CM3 is proud to offer IP Megapixel Based CCTV Systems. State of the Art systems utilizing H.264 technology will limit bandwidth and storage consumption while delivering a High Definition video image.

# ACCESS CONTROL SYSTEMS

Manage your facility effectively through both IP based and Hard-Wired access control systems provided by CM3 Building Solutions.

Access Control allows you to generate card holder and system activity reports and immediately restrict or expand user rights to access, providing full control of your facility that a standard lock and key cannot deliver.

Whether it be a single door system or an integration into your automated building system, we have the solution for your security needs.

## KEEP TRACK OF THE THREE “W’S” IN YOUR FACILITY:

- *Who*
- *When*
- *Where*

## FULL LINE OF READER AND CARD TYPES:

- *Proximity Readers*
- *Smart Card Readers*
- *Magnetic Stripe Readers*
- *Biometrics Readers*
- *Keypad Readers*

# EMERGENCY TOWERS

Our help points have withstood the punishment of tornadoes, floods and other natural and man-made disasters.

Rugged, vandal-resistant outdoor emergency phones and public address systems that help communicate with those in harm's way as clearly and effectively as possible.

With Code Blue's Mass Notification and Event Management Solutions, you can proactively ensure that those that you keep safe will be led out of harm's way.

Code Blue's systems management solutions provide you with the efficiency of full programming, diagnostic and archiving capabilities for the devices on your network right from your control center.
