

Since 1995 our mission at Digital Video Productions has been simple, to preserve the special moments of your wedding day in the most unobtrusive, discreet manner possible. Using hand held cameras and small lights allows us to blend in rather than stick out.

We pride ourselves on personal service and going the extra mile for our clients. Each wedding is unique and our style reflects that individuality. We take personal pride in every video we create. We have thousands of satisfied clients who love our work and would recommend us to their closest friends and family.

Video technology changes every day. We strive to stay ahead of the trend making sure you get a video you will enjoy just as much 20 years from now, as you do today.

*Relive the fastest day  
of your life...*

*Slowly*
