

Wireless Smart Pump-Off Controller (POC)

**Are your wells running
under a Timer switch?**

**Have you thought of increasing
the barrel count at each well?**

Petrolog CAN Do It! (*)

Try it!!!

**A True
Cellular
POC**

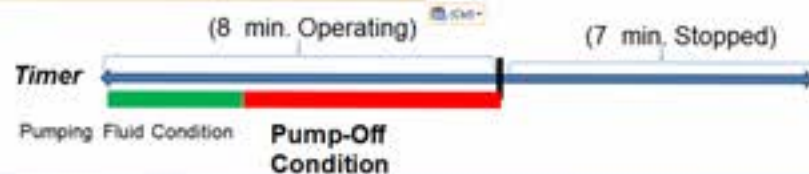

**Cost
Effective!**

Over Pumping and Under Pumping conditions caused by Timer (Based on a 15 min Timer).

Over Pumping Condition:

Under Pumping Condition:

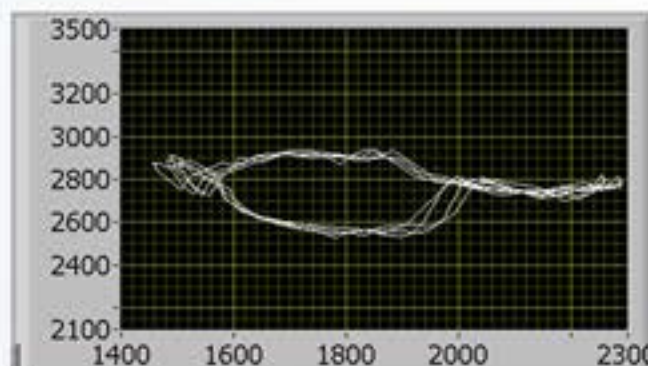

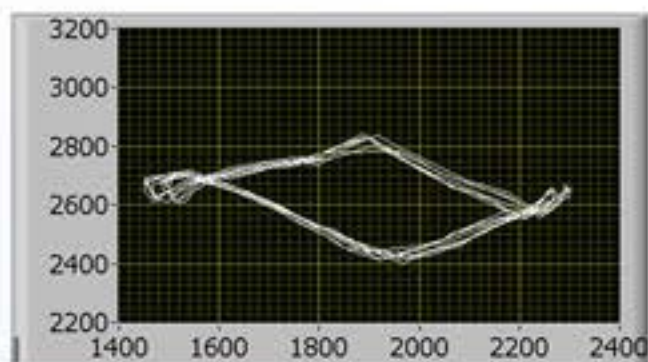

Improves well efficiency.

(*) Applies to most wells with either over-pumping or under-pumping, and/or variable casing pressure conditions.

**Reliable
and
Dependable**

**Innovation
and
Emerging Technologies**

Why Smart?

SELF ADJUSTING ALGORITHM

Petrolog automatically controls the on-off condition of the well through its continuous self adjusting software.

MAXIMUM PUMP EFFICIENCY

Petrolog automatically calculates the optimum dead time to obtain maximum pump efficiency.
