Imaging Source purchases ScanVenture

Monday, February 20, 2011

Jacksonville - Imaging Source Inc., a Jacksonville-based records management company, is pleased to announce the purchase of ScanVenture, LLC, including licensing of the proprietary imaging software, T.R.A.P.R. ©.

The T.R.A.P.R.© software will allow Imaging Source to customize digital data to replicate the look, feel and structure of existing paper files and can seamlessly be integrated with existing third party DMS systems, EMR charts and case manager applications.

T.R.A.P.R.© instantly turns all historic stored paper charts into a fully searchable information database. Leveraging best practice in the digital conversion process, this solution scans, OCRs, and packages all data into a convenient PDF format and allows the digital files to be electronically structured via a unique tab structure.

about us

Imaging Source is a sister company of Filing Source and Shredding Source, all headquartered in Jacksonville, Florida. Together all three companies provide cradle to grave records management that offer the creation of the record to the destruction of the record.
