When this sweet, little kitten came to The WHS, we discovered he was both blind and deaf! He quickly became a staff favourite, and we knew it wouldn't be long until this precious boy found the family he deserved.

# Henry

# December 2013

Henry has adjusted incredibly well considering his disadvantages. He is very smart, follows his owner around, and has even figured out how to get up the stairs and into bed!

# abbey

At only a few days old, Abbey, her mom and 7 siblings were removed from a reservation in The Pas. They were lovingly cared for by WHS staff until they were old enough to be adopted.

# January 2014

Abbey's owner had never been a dog owner before. She was excited when she first laid eyes on Abbey at a WHS adoption event. It was love at first sight! Not a day goes by that Abbey doesn't make her owner laugh or smile!

Monty was found as a stray in Osborne Village with a bite wound, ear mites and an abscess on his leg. He was just over a year old at the time. Budders was also a stray that was rescued. He was given some love at the shelter before he was ready to be adopted.

# monty budders

# February 2014

Monty and Budders are cuddly boys. They are indoor cats with a perch to watch all the birds and squirrels. They share a house and a king size bed with their siblings and human companions.

# randall

Randall came from Peguis as a puppy with several bone fractures and zero manners. After biting a WHS volunteer and spending a week in quarantine, he was placed in foster care for work on his behaviour.

# March 2014

Randall made amazing progress in foster care. So amazing, that his foster family decided to make him a permanent family member! When he's not in front of the camera, Randall enjoys wrestling with his much bigger pack mates, and "supervising" the many foster puppies that have since come into his home.

Ernie's owner surrendered him because he felt he did not have enough time to give him the TLC he deserved. Ernie appeared to have issues trusting people. He didn't know how to play, or interact with people.

# April 2014

After spending a lot of time and energy working with Ernie, he really transformed into a loving, playful, mischievous character with a great sense of humor and a big time love of snacks. Ernie's owners are happy and proud that Ernie is a member of their family, as he's proof that with the proper time, care, and love, a rescue rabbit is a very wonderful friend to have.

# iCat

iCat was found in the North End. He was brought into the WHS with his eye mangled from an attack by another animal. The eye had to be removed. Once he recovered from surgery, he was put up for adoption.

# May 2014

*iCat choose his owner. He stuck out his paws at the sight of someone he liked to get their attention. The plan worked! The two instantly bonded, and iCat is now a family man. He is happy, healthy and full of curiosity.*

Tragically, a car had hit and killed Debby's mom shortly after she gave birth. Debby was transported from Peguis with her 3 siblings. She had frost bite on her paws, and had lost her tail. Her previous owner left them outside in the freezing cold with elastic bands tied around their tails. Once in care, this poor little pup had to be hand fed every 2 hours.

Debby's owners say she has developed beautifully. She is very friendly, obedient and loves to go to the dog park. She's not much of a guard dog, but her adopted family loves her to pieces, and she certainly keeps them active.

Ember was found wandering scared and alone on the streets. She was brought into the shelter at 3 months of age. Being a very smart girl, she was house and kennel trained almost immediately. She also did very well with her clicker training. All she needed was a forever family to show her a little love.

Sandy came to The WHS a homeless and broken boy. He had not one, but two pelvis breaks from 2 separate car hits. As the first one began to heal, the second hit not only re-broke his pelvis, but shattered his jaw as well. Sandy had multiple breaks on both sides of his lower jaw, and his upper jaw was shattered just below his nose. It was uncertain if Sandy would survive.

At only a year old, Teddy was found wandering the streets of the North End. He had no tattoo, microchip or record of owners. Shortly after he was adopted, Teddy was diagnosed with a rare condition that constricted the blood flow to the femur and needed surgery to have it removed.

Jack was lost and wandering HWY 59. He was turned into WHS where he spent 4 months undergoing behaviour training because of food aggression and issues. After adoption, his owners discovered that he had been shot and still had 21 pellets lodged in his body. He had also tested positive for Heartworm, and has gone through a long treatment of very toxic and expensive medication.
