

i have no logo colors or design in mind. i would like something that says it all in the logo without the need for text. i've looked at some logos on line and i like some of these. i dunno why. maybe cause they convey some sort of movement, dynamic, but balanced.

i like cause it conveys what i do: bringing east and west
and sports med

some others that kinda catch my eye. I don't know why they're all circular...

this is what i have on my current business cards. it was a stock photo from vista print. but i like it.

hope this helps for us to start.
