

IT STAFFING SOLUTIONS

SQL & BI Consulting is dedicated to building a relationship with partners by sharing a common goal of delivering the highest quality customer satisfaction.

SQL & BI Consulting will assess the company's current data needs and determine an information management strategy. Because every business sector is unique, SQL & BI assesses each individual department's current reporting and data requirements. We will provide an incremental solution based on business timelines and expectations.

We leverage your current infrastructure to provide a central solution for your reporting and information needs. In addition, training will be offered to user groups to learn the new reporting solutions. From implementation, execution, and post IT support, SQL & BI Consulting delivers full service to all partners.
