

Flexible Solutions For Business Success

DATA QUALITY

Data is a vital asset to a company. Therefore, the quality of the data is critical as well. Databases are almost certain to have entry errors, multiple common entries, and redundancies that lead to incorrect information. Data cleansing is necessary to ensure that the quality of data used in reports is improved.

SQL & BI Consulting can help identify the data quality issues and solutions to solve them.

BUSINESS INTELLIGENCE

Business Intelligence is the ability of the business to convert data into timely and accurate information that generates competitive advantage and adds to the stakeholder value. It simplifies information discovery and analysis making it easy for decision makers of all levels to access, understand, analyze, collaborate and act on information anywhere and anytime. SQL & BI Consulting will assess the company's processes and technology and develop a Business Intelligence plan. It will identify business opportunities with flexibility to act quickly to business demand.

“The ability to link data from official sources and generate reports that are meaningful to our team is incredibly powerful.”

Mark Owen

(Operations VP, LINN Energy)

Game Changing IT Support & Services

DATA INTEGRATION

Data Integration involves combining data residing in different resources and providing users with a unified view of the business information.

DATA MANAGEMENT

Master Data Management ensures that a company's critical data is accurate and consistent across the organization's systems. It helps enforce the policies for continuous data quality.

PREDICTIVE ANALYSIS

Predictive Analysis encompasses techniques to analyze current and historical data to predict future probabilities and trends. Predictive models find patterns in the historical data to identify risk and opportunities.

Business Intelligence

- Consulting
- Project Management
- Architecture
- Application Development

Can your company keep up? Most companies have their employees spend numerous hours scavenging for information instead of having them act on it. SQL & BI Consulting creates a strategic Business Intelligence plan based on the company's goals and its existing organizational and technical structure.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE.

HOW CAN WE HELP YOU?

SQL & BI Consulting has provided their expertise services to leading oil & gas companies like LINN Energy and Bill Barrett Corporation.
