Watch the video on how the Edge Protection system works...

Edge Protection Systems...

Edge Protection is essential when working on buildings at height. Our systems are designed by experienced tradesmen and are manufactured in New Zealand.

The E bracket is without a doubt the most versatile and cost effective Edge Protection on the market. The E Bracket system has been designed (and has passed stringent testing) to comply with AS/NZS 39931:2009.

"I would recommend Edge Protection NZ Ltd. to any prospective purchaser"

"Alena Homes Ltd. has used the services of Karl Emslie and his Edge Protection. I was impressed both with the quality of the Edge Protection Karl Supplied and his knowledge and understanding of the new requirements being enforced by the Labour Dept.

I had a meeting with the Labour Dept. representative in my office which Karl attended and Karl introduced a simple and easy way to address the issue which was more than the Labour Dept. were prepared to offer.

I would recommend Edge Protection N.Z. Ltd. to any prospective purchaser."

Helen Fénwick.
Director of Alena Homes Ltd
