

The new alternative in roofing is available in 2013.

We believe a roof should do more.

We believe a roof should harvest the sun's energy to provide electricity and hot water free to your home.

We believe a roof should withstand the most extreme weather events to protect your family from harm and your possessions from damage.

We believe a roof should do all this and look great, increasing the enjoyment and value of your home.

You could choose concrete tiles, which can crack and fade, or metal sheet, which can dent and rust.

Do you want it done cheap, or do you want it done right?

If you take pride in your work and your home then we want to talk with you.

We are seeking professional people to become licensed distributors.

Tractile is an Australian innovation.
