

i want a blend of this website. (and the next page).

<http://www.nopi-restaurant.com/>

<http://www.lamarcebicheria.com/lima/>

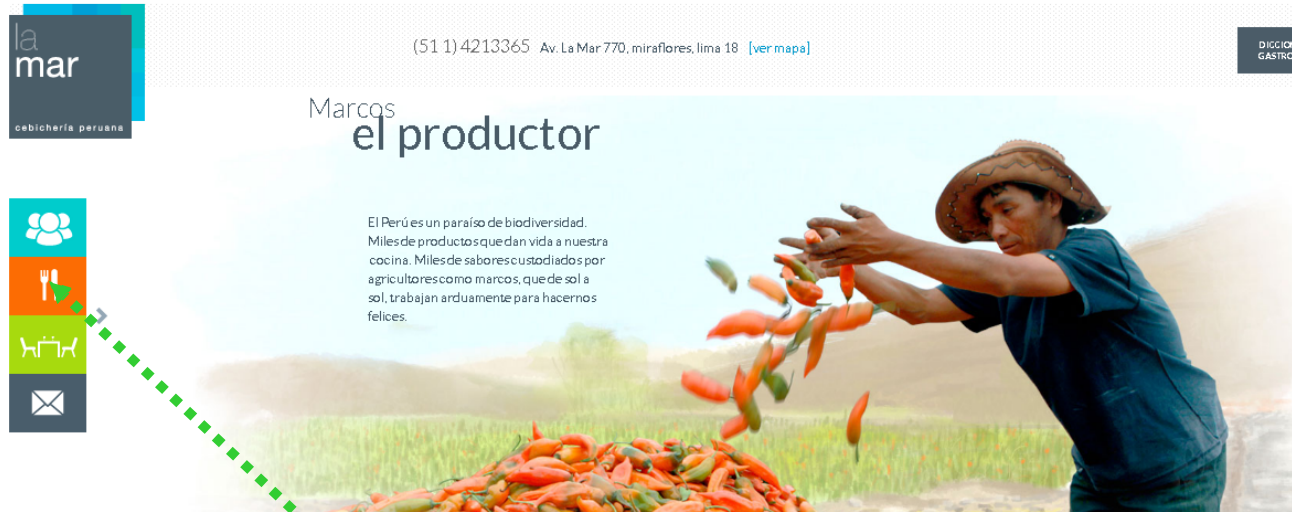

+ like the touch of feeling inovative, modern feeling. Gives a simpleness when seeing it, it feels fresh. And not heavy.

+ But want it more luxury.

I like the minimalistic, but on the same time it should be more luxury.

these pages are not so good though. It is modern but not exclusive in its layout.

I like this picture. That they have shadowed the background. put emphasis on the right stuff.

if you can show that you can  
do this, i can fix picture for  
you to do it on.

+ like this page

- I want it to look more classy/luxury.
